

TINOTENDA MUCHENJE

973-431-8339 | tinotendamarufetu@gmail.com | [LinkedIn](#) | [GitHub](#) | Portfolio

Data Analyst with a Master of Science in Data Science and 4+ years of cross-industry experience optimizing reporting pipelines, data architectures, and BI solutions. Proficient in SQL (advanced CTEs, window functions), Microsoft Fabric, Python, Tableau, and Power BI. Proven track record in reducing operational churn by 10%, cutting reporting turnaround times by 30%, and delivering automated data models across enterprise environments.

Technical Skills

- **BI & Data Visualization:** Tableau, Power BI, Alteryx, Microsoft Fabric, Advanced Excel
- **Databases & Warehousing:** PostgreSQL, MS SQL Server (T-SQL), Snowflake, Databricks
- **Programming & MLOps:** Python (Pandas, NumPy, Scikit-learn, XGBoost), SQL, FastAPI, PySpark, Git, Docker
- **Analytical Methods:** Time Series Forecasting, Dimensional Modeling (Star/Snowflake), SHAP (XAI), A/B Testing, Optuna

Professional Experience

Carlten Construction | Newark, NJ

January 2025 - December 2025

Data & Operations Analyst

- Architected end-to-end Power BI dashboards using **DAX** and **Power Query** to track material procurement, vendor lead times, and site expenditures across 12+ active projects.
- Developed **Python (Pandas)** and **SQL** extraction scripts loaded into **Snowflake** to consolidate multi-source vendor delivery logs, decreasing supply discrepancy rates by 18%.
- Built a predictive inventory reordering model in **Python (Scikit-learn)** utilizing time-series moving averages, cutting excess inventory holding costs by 12%.

Dandemutande Internet Services | Harare, Zimbabwe

June 2023 - December 2023

Business Data Analyst

- Designed automated Tableau monitoring dashboards for network telemetry and client health scores, reducing enterprise churn by 10%.
- Executed SQL CTEs and Window Functions across 2,000+ enterprise usage datasets to identify upsell trends, lifting cross-sell revenue by 15%.
- Automated recurring daily reporting workflows via scheduled Python scripts, decreasing SLA turnaround time by 30%.
- Modeled dimensional star schemas in PostgreSQL to optimize downstream queries, accelerating BI dashboard load times by 25%.

Zimbabwe Health Interventions | Harare, Zimbabwe

May 2022 - May 2023

Data Officer

- Built automated data validation pipelines using **SQL Server (T-SQL)** and **SSIS** for 5,000+ program participants, maintaining 99% data integrity for donor audits.
- Consolidated unstructured multi-district reporting files into a normalized **SQL** relational database, standardizing operational KPIs across 5 regional teams.

NMB Bank Limited | Harare, Zimbabwe

January 2021 - April 2022

Junior Data Analyst

- Built real-time **Tableau** dashboards connected to transactional databases to monitor system uptime and transaction failures, sustaining a 99.9% availability SLA.
- Performed root-cause analysis on transaction error logs using **T-SQL** queries, isolating recurring processing bottlenecks and cutting engineering ticket resolution time by 25%.
- Created scheduled data extract refreshes and implemented Row-Level Security (RLS) within **Tableau Server** to protect sensitive client financial records.

Projects

Enterprise Inventory Risk Engine & Automated Replenishment Suite | *PostgreSQL, Power BI, Python, DAX* - [GitHub](#)

- Modeled 500 SKUs and 46k+ transactions in PostgreSQL; engineered multi-tier SQL CTEs calculating dynamic Average Daily Demand (ADD), Days of Inventory Remaining (DIR), and Reorder Points (ROP); built an executive Power BI suite tracking \$19.00M in inventory against \$20.85M in replenishment exposure with scheduled Python PO dispatch automation.

Enterprise Customer Churn & Network Telemetry Pipeline | *Python (XGBoost, SHAP, Optuna), PostgreSQL, FastAPI, Streamlit, Docker* -

[Streamlit App](#)[\[GitHub\]](#)

- Built an end-to-end churn prediction pipeline ingesting 180 days of telemetry across 5,000 B2B accounts; built PostgreSQL CTEs to isolate latency acceleration as a key defection signal; trained an XGBoost model via Optuna (0.781 ROC-AUC) with SHAP TreeExplainer attributions, deploying a live Streamlit decision app and FastAPI service prioritizing \$3.45M in MRR at Risk.

Education

Montclair State University | Montclair, NJ

January 2024 - December 2025

Master of Science in Data Science (GPA: 3.9)

Chinhoyi University of Technology | Chinhoyi, Zimbabwe

March 2019 - December 2022

Bachelor of Science Honors in Information Technology (GPA: 3.6)
